-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. Claims 1-3, 6-12, 16-18 and 20-22 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Shimada (US 2002/0059952) in view of Gee (US 5,468,652) and Kajimoto (US 6,315,575 B1), for reasons as of record.
2. Claims 4, 13, 14 and 19 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Shimada '952 in view of Gee '652 and Kajimoto '575 as applied to claims 1-3, 6-12, 16-18 and 20-22 above, and further in view of Dran et al. (US 4,321, 418), for reasons as of record.

### *Response to Arguments*

3. Applicant's arguments filed 25 February 2008 have been fully considered but they are not persuasive.

In response to Applicant's argument that the references of record do not teach or suggest a plurality of perforations between solar cells as i) "the mesh structure cited in Kajimoto has the mesh in "the connecting portion of the interconnect," not in an area of the strip not attached to either of the first solar cell or the second solar cell" and ii) "Kajimoto's notches 4 are in the connecting portions 2 and 3", the examiner finds this is

Art Unit: 1795

unpersuasive. First, since the rejected claims recite the limitation that "the plurality of perforations being located at least between the first solar cell and the second solar cell in an area of the strip not attached to either of the first solar cell or the second solar cell" (emphasis added), the limitation includes at least the recited area and also includes other non-specified area. And secondly, since Kajimoto teaches that notches 40 and 41 are in the other area of the stress relief portion 8 in addition to notches 4 in the connecting portions 2 and 3 of the stress relief portion 8. For these reasons, the rejections are maintained.

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
